I have been swamped with RCMP, lawyers and related issues for over a month - most of it stemming from my testifying (July 22nd 2021) in regards to the threats of two mass shootings in Liverpool last year in an unrelated matter that escalated to a direct attempt on my life in from Aug - Nov 2021. This is what I use to do for a living and I am furious with the RCMP for forcing my involvement when all I wanted was to crawl into a hole and die without ever explaining anything.

From Feb 13th to Feb 16th 2022

I have been contacted by only 2 family members - who asked the same question - Please call ?.
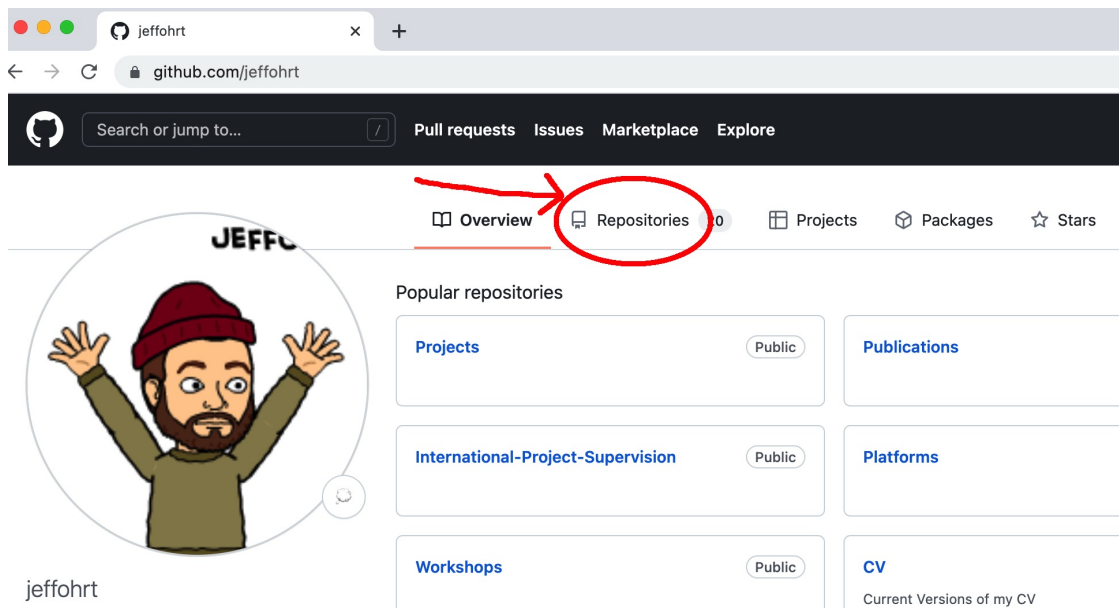

I do not know if the others don't know, don't care, have or have not read, don't believe or whatever else.

On the chance people are struggling to access or read my files, the last page of this document explains how to download the entire repo to be read at your convenience offline.

Each time I update my files, I will notify the media via twitter, and family via the Facebook Message. I will only notify you of major changes or updates.
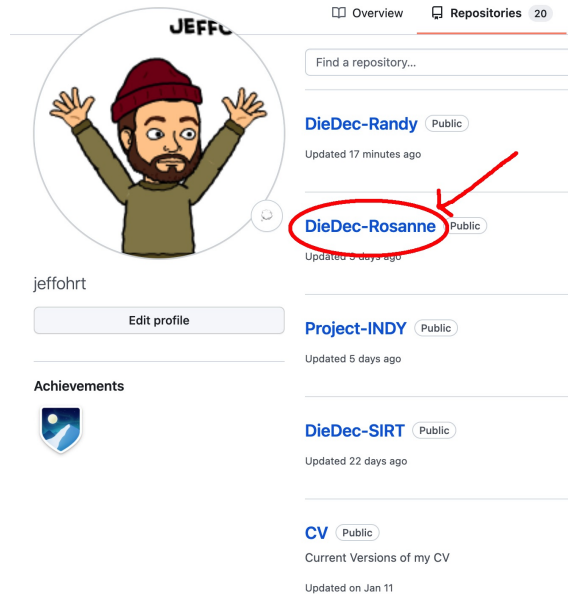

Downloading a Repo

1) Go to https://www.github.com/jeffohrt and click on repositories

2) Pick the Repo you want. There are a lot of things putting me in the ground - Rosanne is the one most relevant to my family.
   Click on the repo you want.

3) You can download the entire repo with the code button - click it.

4) Click on Download - double click when you have the folder.

5) When new information is uploaded, notifications will only go out for major updates. Minor issues - like editing for spelling or similar will not.
